

SECURE
YOUR START/STOP BATTERY PERFORMANCE

HELP YOUR BATTERY

Your battery is the heart of the START/STOP system. While your car engine is off it should not only power your vehicle's electrical systems, such as the radio, lights and other electronics, but also enable the engine to restart in a fraction of a second when you engage the clutch and are ready to go again.

CT5 START/STOP CHARGER AND MAINTAINER

The CT5 START/STOP Charger and Maintainer is specially designed to provide safe and easy charging and maintenance for vehicles equipped with the new generation START/STOP technology.

EASY TO USE AND UNDERSTAND

The CT5 START/STOP Charger and Maintainer is fully automatic for optimal battery charging.

The CT5 START/STOP Charger and Maintainer is easy to understand and follow - it only shows three charging steps: CHECK, CHARGE and CARE.

JUST CONNECT AND FORGET

The CT5 START/STOP Charger and Maintainer is fully automatic for optimal battery charging. That means that the user doesn't have to do anything - simply plug it in to start charging. There are no buttons to press or settings to adjust.

ACCESSORIES

MOUNTING & PROTECT

Our products are designed and developed to be as simple as possible to use.

MOUNTING BRACKET

Robust and versatile mounting bracket for practical charger and cable storage.

PROTECT BUMPER

Helps protect the charger from bumps and scratches. It also gives extra grip on slippery surfaces.

ACCESSORIES

CONNECT & INDICATOR

There are several smart accessories for our quick connector, to make battery care even easier.

CONNECT EXTENSION 2.5M

This extension cable allows the CTEK charger to be used further away from the vehicle or battery.

INDICATOR EYELET M8

Practical for those with batteries that are difficult to access. Shows the battery's charge level simply and clearly.

SECURE BATTERY PERFORMANCE

By regularly charging the battery, its lifetime can be extended by up to three times, which in turn will reduce battery replacement cost and increase reliability. The START/STOP functionality will also be higher, giving more fuel savings and lower CO₂ emissions.

SECURE

YOUR START/STOP BATTERY PERFORMANCE

CTEK was founded in 1997 and has since then been developing and manufacturing high quality battery chargers with unique cutting edge technology, for all lead acid batteries.

DON'T LET YOUR
NEW CAR
STOP YOU!

SECURE
YOUR START/STOP BATTERY PERFORMANCE

CTEK | MAXIMIZING BATTERY PERFORMANCE

CONGRATULATIONS ON YOUR NEW CAR!

You have chosen a car with START/STOP technology. START/STOP technology was invented to save both the environment and your wallet and is soon likely to be standard in the majority of European cars.

When buying a new or almost new car most people assume that everything will work without them having to do anything. However, for cars with START/STOP technology that's not completely true. As soon as six months after purchase, you may notice that the engine doesn't stop as often as it should.

**WE WILL HELP YOU TO MAKE THE
MOST OF YOUR CHOICE**

»MY NEW CAR WILL NOT START«

My car wouldn't start in the parking lot and made me really frustrated and the family late for our weekend activities.

YOUR ENERGY ACCOUNT IS FADING AWAY

Imagine that your battery is like a bank account. Every time you start the car, you make a withdrawal. Do you frequently drive short distances, such as to work or running errands? That means you are withdrawing money without putting any in.

**IF YOU DON'T FILL UP WITH ENERGY IN TIME,
IT TAKES A TOLL ON THE BATTERY.
EVENTUALLY NOT EVEN CHARGING WILL HELP.**

**TO GET THE START/STOP
BENEFITS, LIKE FUEL SAVINGS
AND LOWER CO₂ EMISSIONS
YOU NEED TO CHARGE
YOUR BATTERY REGULARLY!**

»MY START/STOP FUNCTION ISN'T WORKING PROPERLY«

My car idles more often at red lights and keeps the engine running instead of shutting down.

YOUR CAR IS SMART

Your new car with START/STOP technology shuts down at red lights to keep CO₂ and fuel consumption down.

Your battery alone keeps your car alive. It keeps the lights on, the stereo pumping out music and your phone charging.

But your car knows when the battery is too tired to use START/STOP technology. The brain of the car keeps the engine running instead of shutting down and saving fuel and CO₂.

**EVEN THOUGH YOU DON'T REALIZE IT, YOUR
START/STOP TECHNOLOGY IS AT THE MERCY
OF YOUR BATTERY.**

»I WANT TO MAKE SURE MY NEW CAR WILL BE TROUBLE- FREE«

I want to get from my home to the office, every morning and to be in time for important meetings.

IF YOU CHARGE REGULARLY YOU WILL KEEP YOUR BATTERY IN GOOD CONDITION!

To secure your START/STOP benefits you need to use our CT5 START/STOP charger. Just plug it in and our Intelligent CTEK-technology takes care of it all.

**WE LOOK AFTER YOUR BATTERY AND
THE START/STOP BENEFITS OF
YOUR NEW CAR!**

**CHARGE
YOUR BATTERY
AT LEAST
ONCE A MONTH!**
